Adding Hosts/ Inventory group in server

➢ Add Host ip/name in ansible host directory

$ cd /etc/ansible/hosts
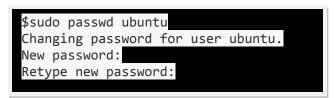

```
[webservers]
3.88.178.199
174.129.179.52
```
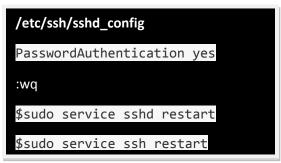

SSH PAIRING

➢ Create Keygen in both client Servers and Ansible server
  $ ssh-keygen –t rsa
➢ Set password for Ansible user in Server and also set password for client users

```
$sudo passwd ubuntu
Changing password for user ubuntu.
New password:
Retype new password:
```

➢ Enable Password Authentication Update the PasswordAuthentication parameter in the **/etc/ssh/sshd_config**

```
/etc/ssh/sshd_config

PasswordAuthentication yes

:wq

$sudo service sshd restart

$sudo service ssh restart
```

➢ Then add the server key in all servers by using ssh paring command

```
$ ssh-copy-id ubuntu@<IPaddress of Client>

Password: <password>
```

```
$ ssh-copy-id ubuntu@<IPaddress of Server>

Password: <password>
```

ANSIBLE SERVER

CLIENT SERVERS
